Dedicated and results-driven DevOps professional with **2 years of hands-on experience** in optimizing and streamlining IT operations, automating deployments and supporting cloud infrastructure. Strong expertise in **AWS, Kubernetes, Docker, Terraform, CI/CD, and Linux** with hands-on experience in AWS networking infrastructure automation containerization, Kubernetes Ingress, Git workflows and production troubleshooting. Experienced in implementing scalable cloud-native infrastructure and improving deployment efficiency.

Technical Skills

Cloud	AWS EC2, EKS, ECS, ECR, VPC, IAM, Load Balancing, ALB, S3, DynamoDB
Build Tools	Gradle
Containers and Orchestration	Docker, Docker Compose, Kubernetes, Helm, Ingress, Services
Scripting	Shell and Python
Version Control System	Git, GitHub
Configuration Management	Ansible
Infrastructure as Code	Terraform, Terraform Modules, Remote state, S3, DynamoDB
CI/CD and GitOps	GitHub Actions, Jenkins and Argo CD

Professional Summary

Capgemini, Mumbai — *DevOps Engineer*

Sep 2024 - PRESENT

- Streamlined the CI/CD pipeline for Java-based applications using Gradle, resulting in a **20% reduction in build and deployment times**.
- Containerized microservices for **2 development teams**, improving consistency over application deployment environments.
- Pioneered Kubernetes adoption in the organization, contributing to a **20% cost efficiency improvement**.

- Implemented infrastructure as code using Terraform for microservices and the Kubernetes infrastructure on AWS.
- Worked extensively with AWS networking including **VPC, Load Balancing, Compute and IAM**.
- Introduced Git version control best practices and supported team with branching strategies and webhook configuration.
- Helped onboard development and junior DevOps teams to Kubernetes through proof-of-concept implementation and knowledge sharing.
- Resolved critical production incidents and minimized business impact through systematic troubleshooting.
- Received commendation for resolving AWS VPC peering issues for a development team.
- Configured **Route53 hosted zones and ALB integration** for custom domain access to Kubernetes application.
- Implemented Kubernetes Ingress for routing traffic across multiple microservices.
- Configured Terraform remote state and locking using **AWS S3 and DynamoDB** and supported remote state management for multiple development teams.

EDUCATION

Gayatri vidya parishad college of engineering (GVPCE) — B. Tech

June 2019 - May 2023

Electronics and Communication Engineering

HIGHLIGHTS

- **AWS Certified Cloud Practitioner.**
